# AI QUICK START GUIDE

START HERE ▶▶

Still need help? We're happy to chat: [hello@infinite.red](mailto:hello@infinite.red).

What aspect of ML do you want to learn?

## Fundamental

You're interested in how AI works more than what it does. This is the academic route.

How fundamental?

## Code from Scratch

You want to be able to train ML from scratch rather than be tied into any particular framework.

[INFINITE.RED/AI/START](https://infinite.red/ai/start)

## Math

You want to understand the core concepts that fuel this impressive technology.

[INFINITE.RED/AI/MATH](https://infinite.red/ai/math)

## Pragmatic

You're looking to implement ML as soon as possible.

What framework should you use?

## TensorFlow

Backed by Google. Known as one of the most dynamic and production ready frameworks.

What language?

## Javascript

The most ubiquitous programming language with a wide variety of platforms.

[INFINITE.RED/AI/JAVASCRIPT](https://infinite.red/ai/javascript)

## Python

The most popular Machine Learning language with countless books and example code.

[INFINITE.RED/AI/PYTHON](https://infinite.red/ai/python)

## Business

You see the potential in AI and you need clarity on how to use it as a disruptor for businesses.

[INFINITE.RED/AI/BUSINESS](https://infinite.red/ai/business)

## PyTorch

Backed by FaceBook. Known to be the dominant community framework.

How core do you want to stay?

## Pure

Learn PyTorch essentials from IBM and other great courses.

[INFINITE.RED/AI/PURE](https://infinite.red/ai/pure)

## Fast.ai

A Library on top of the PyTorch framework for accelerated best practices in ML.
